REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claim is allowable because the prior art fails to teach a cleaning mechanism for contacting the light emitting portion of the laser generator in interlocking relation with the vertical movement of the cutter blade portion from the uppermost position to the lowermost position, the cleaning mechanism cleaning off the light emitting portion by said contact as set forth in claim 23. Also, the prior art fails to teach a laser light traveling in a direction that crosses with a longitudinal direction of the rotation axis of the circular saw blade as set forth in claims 35, 62 and 71.

Bosten et al. teaches including a base 16, a holder 24, a cutter blade portion 28, a laser generator (Fig.2) emitting laser light and a laser generator support member 100. However, Bosten et al. fail to teach the cleaning mechanism as set forth in claim 23.

Bosten et al. teaches including a base 16, a holder 24, a cutter blade portion 28, a laser generator (Fig.2) emitting laser light, said laser light travels in a direction intersecting the rotation axis of the blade when said blade is in the lower position, a laser generator support member 100, means for moving the light emitting portion 90, a resilient body 126, a horizontal/frontward and rearward directions, and first and second stop members (inside walls 48). Also, Smith teaches the use of lens 48 having light beam directed towards the saw blade and focusing on a cut line. However, Bosten et al. and/or Saito et al., alone or in combination, fail to teach the laser light traveling in a direction that crosses with a longitudinal direction of the rotation axis of the circular saw blade as set forth in claims 35, 62 and 71.
